

## Sports Premium Funding Review

As a result of the initial input of funding for PE and Sport at Stow on the Wold Primary School the following has been introduced or achieved:

1. Specialist PE teacher employed to up skill class teachers during curriculum time. The particular areas covered are gymnastics, dance, athletics and quicksticks hockey. We have purchased new schemes of work which are being used as the basis for PE planning. This is aiding consistency in content and enabling transfer of skills from one class to the next. There have been outside CPD opportunities for netball, cricket and using the new schemes of work.
2. The introduction of intra (within school) activities. All children in the whole school have taken part in at least two intra competitions with year 1 and 2 completing 3, class 3 :4 class 4 and 5 completing five. Activities included a quicksticks festival, high five netball, sports hall athletics, infant relays, rounders and of course Sports day. From class 2 upwards the children have also taken part in an in house dance festival. Class 4 took their Beowolf dance to the Gloucestershire dance Festival at the Everyman Theatre.
3. The introduction of the Playmaker award, which is a nationally recognised young leaders award run by the Youth Sports Trust. This has provided leaders to assist in playground activities and intra sports events. Two girls have also helped run the Change4life after school club.
4. Increased Sainsbury's School games competition participation. These are level 2 competitions (against other schools) and we have competed in fifteen competitions including orienteering, kwik cricket and rounders for class 3. Class 4 and 5 have been involved in cricket, rounders, cross country, athletics, tag rugby, quicksticks, netball, football and archery. 88% of class 5 took part in two or more activities and 65% of class 4. Every one completed at least one activity.
5. We took part in national School Sports week, with the Playmakers running lunchtime activities and Class 4 and 5 had a special games making afternoon as well as normal PE lessons. The best games were then taught to class 2 in their PE lesson. This week allowed us to include everyone in different activities, the playmakers to use their new found skills and the infants to have a special relay races afternoon mostly run by the Playmakers. Wrist bands celebrating the school games values were awarded in a special assembly.
6. The range of after school clubs has increased and as a result during 2014/15 98% of the juniors took part in an after school PE/sport club. We have also made successful links with several local sports clubs to ensure our children can continue their chosen sport outside school time.

As a result of our hard work we achieved the Silver kitemark award for the year 2014/15; but more importantly had 98% of our junior children actively participating in out of school PE/sport.

#### Future thoughts:

Continue curriculum CPD through PE specialist, encouraging staff to teach rather than observe.

Audit of PE equipment and consequent updating as required.

NGB courses for staff involved in afterschool clubs.

Encourage more infant participation in afterschool clubs.

Maintain level 2 competition participation, try to achieve 100% for year 5 and 6.
